BRAINSTORMING

Think about a possible website you could make, whether it's for a club you're in, a place to show off and share a hobby/something you're passionate about, or even a fake store that you always dreamed
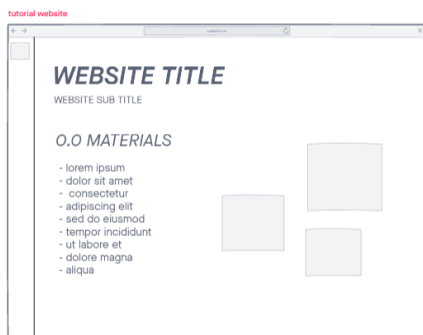

Top three ideas:
1. How to website, teaches someone how to do something
2. Events website/calendar, track events/important dates for your company
3. Photosharing/photography website, share photos you've taken/like

Mockup some quick designs for each idea in invision (add links or images here, make sure links can be viewed by anyone)

1. *idea#1:*   2. *idea#2:*   3. *idea#3:*

By now you all should have some experience with React, when thinking about possible website ideas it is good to think about how plausible it is for you to code it, also good to not go in blind and think about how to best structure your code before you start.

For each idea, what could you make components for? How could you utilize states? (if not applicable right NA)
1. *idea#1*
Components: using the same/similar layouts for each step
States: n/a

2. *idea#2*
Components: similar each day's events layout
States: adding a new event will change the number of events you have on your list

3. *idea#3*
Components: n/a
States: when you click on the picture >> picture will enlargen

PICK AN IDEA

Website: tutorial website: how to make my top 3 favorite desserts
