Directions: <mark>Make a copy of this template- do not edit</mark>, post/link this artifact in the [E1T1 2022 Goals/Modules/Lesson Plans Repository](#) (and gClassroom as needed) when finished. Feel free to add or delete rows based on the lesson.
- I do, YOU do, WE do
- Learner engagement: Plan for an engagement activity every 5-10 minutes, e.g. poll, Kahoot, ask students to screen share and tell you what they are doing/have done
- Check for comprehension: Plan to check for comprehension every 5 minutes
  - Call on individual students; avoid asking questions of the group in general
  - Address students frequently individually, by name
  - Ask students to screen share frequently to demonstrate they are following along
  - Ask closed-ended questions: "did you set up your account successfully, Frank?"
  - Ask the interns to share and demonstrate: "Please share your screen and show us"
  - <mark>Avoid open-ended questions like "Are there any questions?"</mark>
- Link all materials here
- Record a 5-10 minute video delivering key lesson components

Goal/Module: High School Students
Target Students: Summer program interns
Lesson Topic: How to use Premiere Pro
Lesson Objectives/Learning Outcomes: Intern will have a ability to make that video using the profection editing website
Designed by: Su Myat Mon
Estimated Time: Lessons don't have to last for any specified time. Target about 40 min-1h.

Topic/Time?	Lesson Description:	
Supplies:	● A[dobe Premiere Pro](#)	

Icebreaker & Attendance (3-5 minutes)	● Say Good Morning Everyone ● Check on that on how everyone is feeling	
Leader explain why we are doing this assignment (0-10 minutes)	Explain what is Adobe premiere pro is and how Adobe premiere is the editing website that we use for movies and music videos …… We will show open the website and that show them how they look like And show [the introduction video](#)	
Introduction of how to do that assignment (3 minutes)	The purpose of this meeting is to… ● Demonstrate a productive, engaging creating ● Share an example of how I want to learned new skill that throw internship ● Allow time for you to practice using website on your own or with a friend/colleague	
Students do that assignment (10 minutes)	Example: Poll #1: What mobile device do you use? Computer ● Download the website in the computer and log in with school sfusd email ● The login should be free and it will take the most 10 Minutes for students to do that.	
Leader helping with the assignment : (5 minutes)	● Start with a question. Example: What is the skill/process for how you do your editing?	
Students do that assignment (30)	WE DO: ● Create breakout rooms, either for interns to self-group or with specific breakout room assignments ● Interns will take the video of the project that they want to show and use Adobe to edit the simple quick 2 minutes video ● Example: They will learn how to put the clip into the the website and was able to Export as a video and that will learn what are that different type of video is Example Instructions: Intren will take their own video and open the the that Adobe App .Will go to clip and put that to the website	

	. Put all the clip in together and make sure they all are ready go and make it as a full 2 minutes video . will get more point for using that music as well	
Leader check in with students if they need help (3-5 minutes)	Example: Which video editor do you use?	
1 hours	●	

Step by Step on of the that lesson that follow direction
- Go to Google and Type Adobe Premiere Pro
  - Please sign in with school email because it could give you school discount (please remember, this website isn't free for everyone and those are only for discount teacher and students)
- Sign in with your school email
- Download Adobe Premiere
  - If you need any help please watch this video
- Open the app and click create to start new project
- Open the file that the video that you want to edit
- Pull the video clip and put all off them into Adobe
  - Make sure all that video are there also check if they have song (if need)
  - If they don't have sound delete folder but click the file and pause delete on everyboard
- You will have freedom to edit but here are some tips
- Use T sign if you want to add any text in the video
- If you want to save the Video as that MP4, go to top of the app and click Explore
  - Make sure the you name the folder you explore that as Mp4
- Click High Quality 1080p HD in preset section
- Click H.264 for Format
- Click Export
